

HYTANBIO · Oral Film Concepts

Oral dissolving strips, developed around your brand.

PRODUCT PORTFOLIO & CUSTOM SOLUTIONS

51 distinct development concepts across six product families. Brand-specific formulation, sampling, packaging and manufacturing coordination.

2026 · Website Reference Edition

All product visuals illustrate concepts. Final ingredients, loading, suitability, claims, specifications and market pathway are confirmed for each project.

About Hytanbio Tech

Hong Kong coordination. Mainland China manufacturing support.

Founded in 2026 in Hong Kong, Hytanbio Tech supports international business development. The company-described manufacturing base in Shaoxing, Mainland China, was founded in 2014.

Company information describes an R&D center of more than 4,000 square meters, peptide synthesis capabilities, analytical and preparative HPLC systems and controlled laboratories. Oral film programs focus on feasibility, prototypes, specifications, batch documentation and export coordination.

The broader portfolio includes peptide raw materials, lyophilized peptide powders and dissolvable microneedle systems.

Capabilities in the supplied brochure

Environment	Grade 100,000 clean area, testing, air shower, packing and purified water
Team & lines	200+ team and four high-speed lines
Designed output	2 million strips/day; 600+ million/year
Flavor direction	100+ options described; printed menu contains 80 entries including repeats
Scheduling	Brochure mentions a 20-day target; quotation confirms actual timing

Supplied descriptions are not a current capacity audit or a delivery guarantee. Confirm the actual site, line, certificate scope and available capacity for the contracted project.

Choose the right collaboration model

OEM

Manufacture around an agreed formula, specification and package.

ODM

Develop a brand-specific ingredient concept, sensory profile and package.

CRO

Define feasibility, prototype and agreed analytical study deliverables.

CDMO

Connect development decisions with pilot and commercial manufacturing planning.

Quality documentation and traceability

The supplied credential image names Rainbow Candies Bio (Guangzhou) Co., Ltd. as holder. It is a manufacturing reference for review, not certification issued to Hytanbio Tech.

Review the actual project scope

- Named manufacturing entity and production site.
- Current validity, issuer, facility and product scope.
- Ingredient specifications, allergens and supplier controls.
- Approved film, packaging and release criteria.
- Batch traceability, test reports and change control.
- Destination-specific label, ingredient and claims review.

cGMP, HACCP, ISO 22000, ISO 9001, Halal, Kosher and Vegan references require confirmation for the specific facility and formula.

FDA facility registration is distinct from product approval or endorsement.

A portable thin-film format

What are oral dissolving strips?

Thin films designed to hydrate and disperse in the mouth. Ingredient loading, film structure, taste, handling and moisture protection define the final product experience.

Useful development questions

- Which ingredients and loading targets fit the film?
- Which handling and dissolution tests apply?
- Which sensory profile is acceptable?
- Which sachet and package barriers are needed?
- Which instructions and claims are supported?

Fast film dissolution does not establish a universal absorption percentage, onset time or clinical advantage. Age-specific and prenatal concepts require qualified suitability review.

Format	Compare against your brief
Oral film	Portable individual packs; review loading, integrity, taste and moisture barrier.
Gummy	Compare serving mass, chewable experience and formula composition.
Capsule	Assess powder fill, swallowing experience and package requirements.
Tablet	Compare size, compression, handling and intended use.
